

Andrew M.L. Smith, P.Eng.

Andrew was raised in St. John's, and attended Memorial University, graduating with a Bachelor of Mechanical Engineering in 1995. He developed much of his career in Midwest USA, where he also met his wife, Karin. They have one daughter, Amelia, now in grade eight. The family has been back on the rock since 2009.

Through his career he has engaged in many challenging opportunities including project management, strategic corporate planning, heavy construction, product design, workplace safety, and environmental management. He has worked in Newfoundland, Nova Scotia, Illinois, and Nebraska. From 2009 to 2015 he was engaged by Kiewit, seconded to the Hebron Project as Environment Manager. Andrew now operates his own product and process design and improvement firm, Design Smith Inc. He is a registered Professional Engineer in both Newfoundland and Labrador and in Nebraska.

Andrew has been active in St. Bonaventure's College, including on the Facilities committee, undertaking grounds improvements, and building elements for school gardens, Harry Potter Day, and theatre club. In his spare time Andrew undertakes restoration projects on his turn-of-the-century home, vegetable gardening, and competes in road-races with Athletics North-East.

Andrew is energized to apply his professional and volunteer experiences to the continuous improvement of the school. "I believe very strongly in the teachers' talents, the children's capabilities & friendships, and our shared vision of success in a school that produces the best, brightest and spiritually connected graduates; *Men and Women for Others.*"

-St. Bonaventure's College, Board of Governors, 2016-2017
